

WELD COUNTY SCHOOL DISTRICT RE-5J

110 S. Centennial Drive, Suite A
Milliken Colorado 80543

NOTICE OF ASBESTOS REINSPECTION

Weld County School District RE-5J conducted an extensive inspection and evaluation of asbestos containing materials in its buildings during spring and summer of 1988. The result of this work established the basis for our plans to control or remove asbestos from District buildings. Our work also brought us into compliance with the Federal 1986 Asbestos Hazard Emergency Response Act. The District has safely removed asbestos containing material as part of renovations completed in 1996-1997 and 2004. A re-inspection of remaining asbestos containing materials in all district facilities was completed in January of 2004, July of 2007 and most recently in July of 2010.

The results of inspections and evaluation have been summarized in an asbestos management plan for the school district. The plan is on file at each school building and at the Administration Building. You are welcome to review our asbestos management plan at any time during regular business hours. If you desire additional information, please contact the Superintendent of Schools at the Administration Building (phone 970-587-6059).
